

Solution Requirements

Date	30 June 2026
Team ID	XXXXXX
Project Name	Personalized Networking Assistant
Maximum Marks	4 Marks

Define Functional and Non-Functional Requirements:

Create a comprehensive list of requirements to define exactly what your solution will do and how well it will perform.

- **Functional Requirements (FR)** define specific behaviors, functions, or features of the system (What the system should *do*).
- **Non-Functional Requirements (NFR)** specify the criteria that judge the operation of a system, rather than specific behaviors (How the system should *be*).

Fill out the descriptions and necessary details for each category provided below.

Step 1: Functional Requirements (FR)

S.No	Requirement Category	Requirement Description	Priority (High/Medium/Low)
1	Authentication	User logs in using email and password.	High
2	Authorization levels	Single user role with access to all features.	Medium
3	External interfaces	<i>Connects to Wikipedia API and AI models.</i>	High

4	Transactions processing	Processes user input and generates suggestions.	High
5	Reporting	Displays conversation history and feedback records.	Medium
6	Business rules, etc.	Generate only 3 personalized conversation starters.	High
7	Compliance to laws or regulations	Store user data securely and protect privacy.	High
8	<i>Other</i>	Allow users to like or dislike suggestions.	Medium

Step 2: Non-Functional Requirements (NFR)

S.No	NFR Category	Requirement Description	Target Metric / Acceptance Criteria

1	Performance & Speed	System should respond quickly.	Response time < 3 seconds
2	Scalability	System should support more users in future.	Supports 100+ users
3	Security & Data Privacy	Protect user data and history.	<i>Secure local data storage</i>
4	Reliability & Availability	System should work without crashes.	99% uptime
5	Usability & Accessibility	Interface should be simple and easy to use.	New user can use without training
6	<i>Other</i>	System should run on different operating systems.	Works on Windows, Linux, and macOS
